Dear Sir/Mam,

I understand there is a proposed court rule No. 2003-47 that the Michigan Supreme Court will be considering soon. This is a back door approach to making a law. The Michigan Constitution and the United States Constitution both make it very clear that judges are not to make laws but rather to interpret laws only. Why would the Michigan Supreme Court even consider taking steps that would effectively change the law and deny we and other Michigan residents their rights to a jury trial in corporate litigation cases. I am dead against this proposed court rule No. 2003-47 and I want the judges to know that.

Thank You

Harlow C. Hall
